Gonzalo Baliarda

Software Engineer

ABOUT ME

Passionate and hardworking Software Engineer, graduated at ITBA with hands-on experience in web full-stack development, data science and machine learning.
Currently working as a Data & AI Intern, focusing on learning and applying machine learning and deep learning techniques to solve real-world problems. Always eager to explore new technologies and expand my skill set, driven by a strong desire for continuous learning and innovation.

EDUCATION

Bachelor of Social Science, Hans Christian Andersen School, Buenos Aires
2018

Software Engineering ITBA, Buenos Aires
2019-2024

EXPERIENCE

Agile Solutions

jun 2022 - sept 2022

Full stack developer using React with TypeScript, GraphQL and SAP.

ITBA - CAFiBiS

may 2023 - dec 2023

Research Assistant: conducted pedestrian simulations based on DXF plans. Successfully developed a project that encompassed a React-based Webapp for the frontend, integrated with an API using Spring and a PostgreSQL database. Designed the simulator using Java and Python for efficient data parsing.

Accenture

may 2024 - present

Data & AI Intern: contributed to delivering data-driven solutions for clients by implementing machine learning models, forecasting techniques, and data analysis to address business challenges. Collaborated with clients to identify needs, design tailored solutions, and ensure successful implementation. Gained hands-on experience in developing predictive models, analyzing trends, and communicating insights effectively to stakeholders.
